# Online Food Ordering System

Ordering food or meals with just a few clicks or taps on a smartphone or computer, customers can browse through menus, place orders, and pay without the hassle of making phone calls or physically visiting a restaurant has become very convenient.

# Purpose

The main purpose of an online food ordering system is to provide customers with a convenient and efficient way to browse menus, place orders, and make payments for food delivery or pickup, thereby enhancing the overall dining experience.

The entire activity is to automate the process of day to day activities of food ordering services:

- ▶ Nominal charge of 15% for declining food delivery: Customers may incur a fee of 15% of their order total if they choose to decline a food delivery.
- ▶ Purpose of the charge: This fee may serve multiple purposes, including covering administrative costs associated with processing orders and coordinating deliveries. It may also discourage frequent cancellations, which can disrupt restaurant operations and inconvenience delivery personnel.
- ▶ Industry standard: Such charges are common in the online food ordering industry and are often included in the terms of service of major platforms. In summary, the 15% charge for declining food delivery helps cover costs and discourages cancellations, aligning with industry norms.

# Scope of the System

- ☑ Covering Administrative Costs: The charge may help cover administrative expenses incurred by the platform when processing orders, managing logistics, and coordinating with restaurants and delivery personnel.
- ☑ Discouraging Frequent Cancellations: By imposing a charge for declining food delivery, the platform aims to discourage users from canceling orders frequently.
- ☑ Encouraging Responsible Ordering Behavior: Implementing a charge for declining food delivery encourages users to be more thoughtful and considerate when placing orders.
- ☑ Ensuring Fair Service for All Users: By discouraging frequent cancellations, the platform can ensure fair and equitable service for all users.
- ☑ Overall, implementing such charges as part of the platform's terms of service helps streamline operations, minimize disruptions, and foster responsible ordering behavior among users.

# Existing Features

Online Food Ordering System has been designed to computerize the following functions that are performed by the system:

- ▶ Meal preferences.
- ▶ Adding a new menu.
- ▶ Modification to meal assigned.
- ▶ Registration of new customers.
- ▶ Meal assigned accordingly to customer's need.
- ▶ Statement of customer details.
- ▶ Online ordering tracking of meals.

# Benefits of Online Food Ordering System

1. Variety and Choice:  
Online platforms often showcase a wide range of restaurants and cuisines.
2. Time-saving:  
Ordering online eliminates the need to wait on hold or stand in line, streamlining the ordering process.
3. Customization:  
Many online platforms allow customers to customize their orders, specifying preferences or dietary restrictions.
4. Order Tracking:  
Some online food ordering systems provide real-time order tracking.

# System Requirements

## Software Requirements:

- ☑ Editors: VS Code IDE, NetBeans IDE, Sublime Text Editor.
- ☑ Programming Languages: HTML 5, CSS3, JS, PHP (v8.2.0), MySQL.
- ☑ XAMPP Control Panel (v8.2.12).
- ☑ Database: MySQL (MySQL is an open-source relational database management system (RDBMS) that allows users to store, manage, and retrieve data efficiently).
- ☑ Browser: Google Chrome (v123.0.6312.28), Brave (v1.65.67).

# System Requirements

## Hardware Requirements:

- ☑ PROCESSOR: Intel Core i3 3220 or AMD Ryzen 3 3250U
- ☑ PROCESSOR SPEED: 2.60 GHz
- ☑ GRAPHICS CARD: AMD Radeon
- ☑ RAM: 4 GB (minimum)
- ☑ HARD DISK: 10 GB (minimum) HDD/SSD
- ☑ PLATFORM: Windows 7/8/10/11 64-Bit

# How to Get Started: Placing an Order

- ▶ Create an Account:

Sign up using your email or connect via social media.

- ▶ Browse for Restaurants:

Explore the available restaurants in your area by browsing through the platform's listings.

- ▶ Select Your Items:

Browse through food menu and select the items you want to order.

- ▶ Select Payment Method:

Preferred payment method, such as credit/debit card, mobile wallet, or cash on delivery.

- ▶ Place Your Order:

Once everything looks good, confirm your order to place it with the restaurant.
